Stephanie Patricia Anshell

sanshell@ucsd.edu | (925) 348-7120 | linkedin.com/in/stephaniepatriciaanshell | github.com/stephaniepatriciaans |
stephaniepatriciaans.github.io/portofolio

Analytical and results-driven **data science undergraduate with a finance minor**, dedicated to turning complex economic and operational datasets into measurable business value. Experienced in end-to-end machine learning, spatial analytics, and predictive modeling. Built data-driven forecasting and visualization tools that reduced stock-outs by 20 %, halved decision time, and cut material costs by 15 %. Proficient in Python, SQL, and Tableau. Fluent in English and Indonesian.

EDUCATION

UNIVERSITY OF CALIFORNIA SAN DIEGO — **La Jolla, California, USA**
Bachelor of Science in Data Science and Minor in Finance — Expected 2026

UNIVERSITY OF CALIFORNIA BERKELEY EXTENSION — **Berkeley, California, USA**
Certificate Data Analytics, Data Analytics Bootcamp — November 2023

SKILLS

Tools/Skills: Python • SQL • NoSQL • Tableau • Jupyter Notebook • Microsoft • JavaScript • MATLAB • C++ • Streamlit
Frameworks/Libraries: Pandas • Scikit-learn • Seaborn • TensorFlow • Matplotlib • Scipy • API • PySAL • GeoPandas
Other Skills: Data Cleaning • Statistical Modeling • Forecasting • Dashboarding • Budget Optimization • Accounting
Language: Indonesian (native) • English (fluent)

EXPERIENCE

IDX Exchange (*Real Estate Data Science Platform*) — **Remote, USA**
Data Scientist Internship — September 2025 - Present

- Built and evaluated ML models to predict U.S. home prices using Cotality's Trestle API data.
- Designed end-to-end data pipeline (EDA → Feature Engineering → Model Tuning → Deployment).
- Optimized regression algorithms (Linear Regression, Random Forest, XGBoost), achieving $R^2 \approx 0.89$ and MDAPE ≈ 6%.
- Created reproducible Jupyter workflows & collaborated weekly with senior data scientists for model refinement.

GAF *(Authorized distributor of GAF Roofing materials in Indonesia, focused on supply chain operations.)* **Jakarta, Indonesia**
Data Scientist Internship — January 2024 - September 2024

- Forecasted demand with ARIMA & Decision Trees; improved accuracy by 15 % and cut stock-outs by 20 %.
- Created Automated KPI trackers in Tableau and reduced monthly reporting time.

PROJECTS

Home Price Predictions | *Python, pandas, scikit-learn, Matplotlib, NumPy, REST APIs (Trestle/Cotality), Git, Tableau* | Github: github.com/stephaniepatriciaans/Home_Price_Predictions

- Built a full ML pipeline to predict residential property prices using 80k+ housing records.
- Cleaned, encoded, & imputed missing data; engineered log-transformed & interaction features for numerical stability.
- Trained, tuned Ridge & Random Forest models achieving $R^2 = 0.89$ & MDAPE ≈ 6%, explaining key pricing drivers.
- Produced visual diagnostics (residual plots, feature importances) to reveal influential factors in real-estate valuation.

TrueFork | Python, scikit-learn, Pandas, JavaScript | GitHub : github.com/stephaniepatriciaans/TrueFork | Live Site : stephaniepatriciaans.github.io/TrueFork/

- Explored 83k Food.com recipes & ~1 M ratings; engineered a GridSearch-tuned scikit-learn pipeline (ColumnTransformer → RandomForest) to predict scores and test if unhealthy dishes rate higher
- Published an interactive HTML report via GitHub Pages that visualizes rating bias patterns and key model insights.

Loan Charge Offs | Python, scikit-learn, TensorFlow | GitHub : github.com/stephaniepatriciaans/Project-Loan-Charge-Offs

- Trained Random Forest & Deep-Learning models that reached 94.9% accuracy on credit-card charge-off prediction (↑ 6 pp over baseline logistic model).
- Delivered an interactive notebook that lets users tune risk thresholds and monitor misclassifications.

Urban Transit & Crime | GeoPandas, PySAL | GitHub : github.com/stephaniepatriciaans/Urban-Transit-and-Crime

- Analyzed 1 M+ NYC/Chicago records; Geographically weighted regression (GWR) mapped station-adjacent crime hotspots & socioeconomic risk.
- Interactive maps & dashboards fueled city-planning talks on equitable policing.
